ICRI Surface Profile Guideline

Proper surface prep is an extremely important step in the application of new floor coatings, liquid, tile or otherwise. All Industrial coating manufacturers specifically call out for detailed surface prep in their specifications for their coating systems. The International Concrete Repair Institute (ICRI) has created a Concrete Surface Profile (CSP) chart for all manufactures and contractors to follow.

Diamond Grinding

ICRI Profiles: 2 & 3

Diamond Grinding can produce a ICRI CSP of between 2 & 3. A number 2 is normally produced via grinding with diamond tooling of 30 grit.

Shot Blasting

ICRI Profiles: 3 - 7

Shot blasting is capable of producing ICRI CSP profiles of between 3 - 7 typically

Scarification

ICRI Profiles: 5 - 9

Scarifiers are capable of producing ICRI CSP Profiles between 5 - 9

THE ELECTRIC DUMPER RANGE FROM ECOVOLVE is the world's only fully electric hi-tip dumper. The dumpers are available in three different weight capacities - 1763 lb, 2200 lb and 3300 lb skip. There are no fumes, no emissions, low noise and the steering system significantly reduces the risk of unwanted tire marks. What's more is that the super elastic tires eliminate the possibility of puncture, making the ED Range suitable for both indoors and out.

The electric dumper is perfect for use where operating levels must be low while the compact size and small turning circle means the ED can go where others can't.

CUTTING & DEMOLITION EQUIPMENT

Husqvarna DXR 140, DXR 270 & DXR 300 Demolition Robots

Applications:

- Perfect for demolition and smaller excavation work in concrete and brick structures, both indoors and out. It is also suitable for pile-driving, staircases, and roof applications.
- Efficient in tough, dirty environments such as steel and cement processing plants.
- Small design enables work in confined spaces, such as basements.

Benefits:

- Easy to remove side covers to facilitate service and inspection.
- 360° of rotation, based on a hydraulic/electrical swivel technique, allows a more flexible work area.
- Individually controlled outriggers enable it to work on uneven work surfaces or close to walls.
- Low machine profile does not block the line of sight.
- Zero exhaust emissions. 100% electric over hydraulic operation.

* Comes with 100ft cord			

Grappler

Suitable for demolishing masonry or wooden structures. Can pick up materials to sort and load.

Crusher

Perfect for crushing concrete and brick in buildings, staircases, and roofs where low noise and minimal vibrations are required.

Steel Shears

Ideal for use in sensitive areas such as process industries, as well as demolition of structures, steel, and piping.

Standard Bucket

Ideal for excavation and debris removal.

Drum Cutter

Made for surface profiling rock or concrete, trenching, excavating frozen soil, soft rock excavation in quarries, demolition and dredging.

Breaker

Outstanding power to weight ratio and quick and easy to position. Typical applications are road construction, smaller trenching and demolition jobs.

THE ELECTRIC DUMPER RANGE FROM ECOVOLVE

is the world's only fully electric hi-tip dumper. The dumpers are available in three different weight capacities - 1763 lb, 2200 lb and 3300 lb skip.

There are no fumes, no emissions, low noise and the steering system significantly reduces the risk of unwanted tire marks. What's more is that the super elastic tires eliminate the possibility of puncture, making the ED Range suitable for both indoors and out.

The electric dumper is perfect for use where operating levels must be low while the compact size and small turning circle means the ED can go where others can't.

PUMPS & SPRAYERS

Chemgrout CG555 Piston Driven Pump & Mixer Trailer

Designed to mix and pump a variety of products, including neat cement, self-levelers, and most packages grout mixes.

Mixing Tank:	45 gal	DAY \$525
Holding Hopper:	12 gal	WEEK \$1575
Max Output:	8 GPM	MONTH \$4725
Includes:	Up to 150 ft of hose	

Electric Carrousel Pump w/ Mixer - 2" Hose

All in one pump and mixer that can be sprayed overhead. Applications include form and pour concrete repair materials, construction grouts, epoxy grouts and shotcrete materials.

Power:	220V / 50amp	DAY \$450
Size:	100 gal hopper	WEEK \$1350
Includes:	2"x50' hose and Stucco/Shotcrete Gun	MONTH \$4050
Can be sprayed overhead		

Carrousel Pump Electric - 1.5" Hose

Pump and spray a variety of commercial products - epoxy, grout, cement, or plaster with or without aggregate.

Electric Power:	110V/15amp	DAY \$375
Size:	13 gal hopper	WEEK \$1125
Hose Length:	20 ft	MONTH \$3375

Quikspray Mixer - Electric

Designed to allow lower dumping heights for a variety of containers.

Power:	110V	DAY \$125
Volume:	4+ cu/ft working capacity	WEEK \$375
Height:	27.5 in min - 46 in max	MONTH \$1125
Power Source:	Electric	

ToughTek P30 Rotor-Stator Pump

Used for underlayments with a maximum distance of 100'+. Adjustable flow rate with an output of 200 bags per hour.

Power:	230V, 30 amp/single-phase	DAY \$375
Size:	16-gallon hopper/ 2.2 cu. Ft.	WEEK \$1125
Hose Length:	66 foot or 132 foot (depending on application)	MONTH \$3375

ToughTek CM40 Continuous Mixer

Ideal for larger projects, the ToughTek CM40 continuous mixer will improve your crew's production rates with an output of up to 300 bags per hour of self-leveling underlayment.

Power:	230V, 30 amp/single-phase	DAY \$205 WEEK \$615 MONTH \$1815
Size:	16-gallon hopper/ 2.2 cu. Ft.	
Output:	Up to 300 bags per hour	

ToughTek S340e Portable Pump/Sprayer

Graco's piston pump technology easily handles low, medium, and high-density materials.

Power:	120V, 15amp	DAY \$375
Weight:	150 lbs	WEEK \$1125
Includes:	1.5 in x 30 ft hose	MONTH \$3375

Graco 833 Gas Powered Big Rig Sprayer

Gas hydraulic unit that can spray it all including asphalt emulsions, waterproofing, elastomeric acrylics, and mastics. *Do not use with Silicones.

Weight:	150 lbs	DAY \$325
Includes:	50ft airless hose and 3ft whip hose	WEEK \$975
MONTH \$2925		

Graco 7900 Gas-Powered Sprayer

Can spray all paints, acrylics, polyurea, and cold tar.

Weight:	185 lbs	DAY \$105

HYDRONIC CLIMATE CONTROL

The ultimate in fuel efficiency and building environment control. Rugged equipment designed to provide all the benefits of a permanent HVAC system while saving the permanent system from the wear and tear of construction.

FUEL OPTIONS

HYDRONIC HEAT

- Zero interior emissions for fume free work area
- Dry and evenly distributed heat for temperature and humidity control
- Fully MERV9 and MERV13 filterable air standard with the option to add HEPA filtration
- Tremendous fuel savings of 50-70% than traditional heating methods
- Total control of building environment leading to complete production schedule control
- Capability of heating from 300 to 1.5 mil BTU

RECIRCULATING INDIRECT HEAT

Units are placed outside forcing heated air into the structure through ducting. Heated air from within the structure is circulated back to the heating unit to increase fuel efficiency.

FUEL OPTIONS

RECIRCULATING INDIRECT:

- 30-50% less fuel usage than traditional heating methods
- Lower moisture levels entering
- Fume free workspaces
- More even temperature distribution
- Remote thermostat availability
- Modular and fuel flexible
- Capability of heating 600 to 1 mil BTU

GROUND THAW

- All hose reels includes 4,500 lf of ground-thaw hose.
 - Capable of 9,000 sq ft of ground-thaw or 13,500 lf of concrete cure
- Traditional trailer systems available that include a generator and extended running fuel cell
- Custom project solutions with multiple unit sizes
 - Three different sizes of individual heating units and hose reels available
 - The ability to power 1-5 hose reels off a single unit allowing for up to 54,000 sq ft of ground-thaw or 81,000 sq ft of concrete cure to be accomplished from a single source
- Fuel flexibility- Unlike traditional ground-thaw trailers, all of our units can operate on diesel, natural gas, and propane
- Remote monitoring with text alert features standard on all units
- Units capable of pumping over 30' overhead

About Vapor Abrasive Blasting

- Generates less dust - 92% less airborne dust than dry blasting
- Optimizes air, water and media ratio – resulting in a fine mist with a blast that is powerful, but with less dust
- Uses less water than traditional water-based wet blasting
- Uses less media than wet blasting, so clean up is minimal and you save on media costs

50' Blast Hose Extension	\$40/day \$120/week \$360/month
50' Air Hose Extension	\$30/day \$90/week \$270/month
Crushed Glass Media	\$9.25 (50LB bag) for blasting concrete/masonry or when a light blast is required.
Garnet Blast Media	\$17.80 (55LB bag) for blasting steel or when an aggressive blast is required.
